High Quality Superplasticizer Concrete Admixture

High Quality Superplasticizer Concrete Admixture is a kind of powdery Polycarboxylate high-performance superplasticizer made by a new process. It has an excellent comprehensive index, good dispersibility, high water reduction rate, good adaptability to various cement, and no pollution in green. A high performance environmentally friendly product.

Main physical and chemical indicators

Item	Unit	Standard
Appearance	/	White powder
Density(23℃)	Kg/m³	500±50
PH (23℃)	/	6.0±1.0
Solid Content	%	97.0±1.0
Moisture content	%	≤3.0
Water Reducing Ratio	%	≥25
Cl-	%	≤0.02
Alkali content	%	≤0.3

USE Performance:

High Quality Superplasticizer Concrete Admixturer parameter of this product is 0.16-0.3% of the total amount of cementitious material, and the water reduction rate is >25%.

This product does not contain harmful components and has no pollution to the environment.

No chlorine, low alkali.

Scope of application:

High Quality Superplasticizer Concrete Admixture is mainly used in premixed dry mortar and unshaped refractory materials, including cement-based non-shrinkage self-leveling materials, cement-based non-shrinkage grouting materials, pore pressure grout, emery wear-resistant floor, etc.; For high fluidity self-compacting concrete.

Packaging transportation and storage:

The powder has a certain degree of moisture return, should be sealed and stored, and keep the surrounding environment dry and ventilated.

Do not exceed 40 °C, do not oversize.

Why choose us

Q1: Are you a manufacturer or trading company?
